

Early Intervention Chicago

Child's Voice Chicago is a listening and spoken language program for infants and toddlers with hearing loss and their families.

Parents and caregivers play an active role in our program and learn how to develop listening and spoken language skills in their natural environment.

Child's Voice Chicago offers the following services:

- Home-Based Initial Evaluations for Speech Therapy and Aural (Re)habilitation (DT-H)
- Home-Based Speech and Aural (Re)habilitation Services
- Center-Based Individual Speech and Aural (Re)habilitation Services
- Center-Based Aural (Re)habilitation Toddler Group

At Child's Voice, a child with hearing loss learns to listen and to speak.
